

Benefits

The Ecodrum™ system is a proven technology, successfully installed on operations throughout North America and beyond. The Ecodrum™ is perfect for both large and small scale production, and offers the following benefits:

- Clean and simple to operate
- Low cost operation
- Reduces odor and pathogens
- Maintains composting activity in cold weather
- Eliminates ground and water contamination
- Produces a high quality compost used as a soil enhancer

COMPOSTING, SIMPLIFIED.

 Poly-CanAm

Cost Effective

The Ecodrum™ is a year-round controlled system. The cost of owning and operating the Ecodrum™ is comparable to, or less than that of other management options.

Fits Your Farm Operation

The specialized PLC controller (patent pending) allows for accurate automation of your composting operation. By simply choosing a pre-set cycle that matches your operation, the system will automatically adjust to your current needs.

		Ecodrum™ Model					
		410	420	720	730	740	750
Estimated Daily Capacity	55lbs	110lbs	330lbs	525lbs	690lbs	925lbs	
	25kg	50kg	150kg	240kg	315kg	420kg	

* Nominal outside diameter of drum for 4 series models is approximately 48" and 7 series models is approximately 72".

** Capacities listed are maximum estimated pounds of mortality. Actual capacity of any Ecodrum™ model may vary depending on factors such as species, recipe and bulking material used. Food waste/fish waste is approximately double the capacity that is shown.

Features

- Molded from corrosion-free polyethylene for longevity
- Control system is automated and easy to use
- Forced air exhaust
- Supported by heavy-duty drive
- Powered by a 1hp 220v motor for low energy cost
- Stainless steel temperature probe
- Quick latch door
- Automatically discharges compost every rotation
- Expandable with 10' and 20' kits available

Optional Equipment

- Conveyors 20' or 30'
- Vertablend Mixer
- Scale system
- Bone crusher
- Bio filter

Why Ecodrum?

Ecodrum™ Composter is the leading provider of onsite in-vessel composting systems in North America.

In the past decade, Ecodrum™ has built relationships with over 1,000 clients worldwide. Ecodrum™ continues to work diligently with top universities on product development and compost research, including Texas A&M, Washington State University, University of Arkansas, and Louisiana State University, amongst others.
